

## Drain Rings Clean Continuously

Epa registered - OR - Certified Green

Time-release treatments for consistent and continuous cleaning of sanitary drains. Prevents buildup, clogging, and odor causing bacteria.

### New and Improved Formula

Drain Rings are a time-release± polymer matrix that stores cleaning agents in its pores.

When water contacts the surface, Drain Ring releases its specialized cleaning agents, effectively treating drains. Drain Ring conforms to the drain opening to treat water as it enters.

Conforms to the drain

Fits 6 to 8 inch drains

Easy to use

Available in 30 or 45 day treatments

For all sanitary drains

Install Drain Ring at the drain opening for continual cleaning that prevents buildup, pooling, clogging, and foul odors.

### Next Gen

- Cleans for up to 30 days
- Snug fit with added foam spacer.
- Reinforced plastic strip prevents breakdown
- Buoyancy: Increased surface contact.

### Monthly

- Continuous Cleaning: Drain Rings clean continuously in the presence of water for a full 45 days.
- Efficiency: long-term cleaning.
- Longevity: Change Drain Rings once a month for no hassle upkeep.
