

DrainRings®

Time-Release Drain Treatment for Sanitary Systems

Drain Rings provide time-release cleaning at the drain opening to help prevent buildup, odors, and clogs—supporting cleaner operation with minimal maintenance.

REDUCES BUILDUP & ODORS | 30-DAY MAINTENANCE

What's building up in your Drain?

Even in clean facilities, drain systems collect organic material, grease, and debris over time. This buildup restricts flow, causes odors, and leads to recurring maintenance issues if not addressed at the source.

Why Choose Drain Rings?

Continuous Cleaning

Time-release formula activates with water flow to help keep drains clean for up to 30 days.

Reduced Drain Issues

Reduces buildup that leads to restricted flow and recurring drain issues.

Fights Odors

Helps minimize odor-causing organic buildup in drain systems.

Non-Dissolving Design

Maintains structure in water and leaves no residue behind.
