

CleanBond

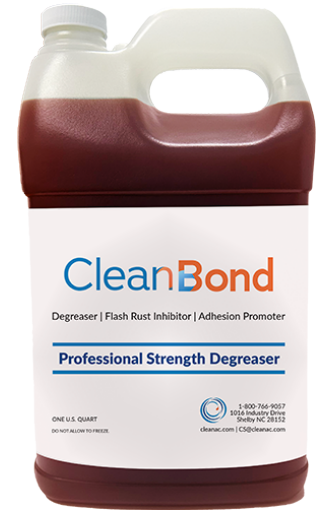

Clean Bond: The Essential Prep for Metal Resurfacing

Achieve a Perfect Surface Every Time

A clean surface is the first critical step in restoring metal surfaces effectively.

Clean Bond is designed as an all-in-one solution, acting as a:

- Cleaner
- Degreaser
- Flash Rust Inhibitor
- Bonding Agent

CLEANER | DEGREASER | STRONG RUST INHIBITOR | BONDING AGENT

Originally created to prepare HVAC condensate pans for Pancrete—our permanent, self-leveling drain pan resurfacer—Clean Bond’s versatility makes it ideal for any metal resurfacing project.

Key Benefits of Clean Bond

- **Powerful Degreasing:** Breaks down oils and particles at a molecular level, making rinse-off easy.
- **Easy Application:** Spray-on formula for fast, thorough coverage, even in hard-to-reach areas.
- **Reduces Prep Time:** Eliminates the need for heavy scrubbing and cuts down prep time.
- **Rust Protection:** Acts as a flash rust inhibitor, preventing surface rust for up to 3 days if immediate coating isn’t possible.
- **Enhanced Bonding:** Delivers a laboratory-developed bonding agent that adheres strongly to metal surfaces, ensuring coatings achieve maximum durability.

Application Instructions

1. **Apply Clean Bond:** Spray onto the surface, ensuring full coverage.
2. **Allow to Dwell:** Let Clean Bond sit for 10–15 minutes to activate degreasing and bonding properties.
3. **Rinse Thoroughly:** Rinse off residue, washing away dirt, grime, and oils. The surface will be prepared and protected, ready for coating.

Coverage and Availability

- **Sizes:** Available in Quart or Gallon.
- **Coverage:** 1 gallon treats approximately 400 sq. ft.

Maximize Your Resurfacing Results with Clean Bond

Prepare metals to perfection with Clean Bond. This all-in-one cleaner, degreaser, rust inhibitor, and bonding agent simplifies the process, saving time and enhancing final results.
