

Tech Sheet — V570

■ Product Overview

High-Performance Corrosion-Proof Surface Protector
Engineered to seal and protect vertical, curved, and uneven HVAC/R surfaces.

- **Form:** liquid; two parts - mixes to white roll-on/brush-on coating
- **Color:** white when mixed
- **Primary Use:** Seals and protects metal surfaces

■ Key Benefits

- Corrosion-proof coating with strong adhesion to metal, concrete, plastic, copper, and stainless steel
- Stops corrosion and prevents water damage by sealing and smoothing surfaces
- Fills fine cracks & smooths rough surfaces to extend equipment life
- Resistant to harsh coil cleaning chemicals
- Water-resistant barrier for added durability
- Designed to be applied under Pancrete®

■ Application (Overview)

- Mix Part A and Part B according to instructions
- Apply V570 to vertical, curved, or uneven surfaces
- On horizontal surfaces under standing water, V570 should be used along with Pancrete on drain pans.
- Can be applied by brush, roller, or spray depending on surface and project needs

■ Safety & Handling

- Respiratory Protection: None required if adequate ventilation is maintained.
- Ventilation: Local exhaust at point of release recommended; provide safety shower and eye wash station.
- Eye Protection: Chemical splash goggles (face shield if needed).
- Protective Gloves: Rubber gloves or impervious gloves resistant to handled materials.
- Body Protection: Impervious clothing as needed.

■ Environmental Info

- PreveDisposal: Dispose in accordance with local, state, and federal regulations. Do not discharge into water sources.
- Containers may retain hazardous residues and must be safely discarded. This material and its container must be disposed of in a safe way.

■ Available Sizes / Codes

- 1-pint kit (Parts A & B)
- 1-gallon kit (Parts A & B)
- 5-gallon kit (Parts A & B)

■ Certifications

- U.S.-based formulation and manufacturing
- Low-VOC formulation (compliant with federal regulations)
